B.E. (IT)

DISTRIBUTED COMPUTING SYSTEM

(2015 Course) (414462) (Semester-II)

Time : 2¹/₂ Hours]

[Max. Marks : 70

- Instructions to the candidates:
 - 1) Answer Q.1 or Q.2, Q.3 or Q.4, Q.5 or Q.6, Q.7 or Q.8, Q.9 or Q.10.
 - 2) Figures to the right indicate full marks.
 - 3) Neat diagrams must be drawn wherever necessary.
 - 4) Assume suitable data, if necessary.
- Q1) a) Is it a good to aim at implementing the highest degree of transparency always? Justify your answer. [6]
 - b) Rephrase the meaning of heterogeneity in distributed system and also show how it is overcome. [4]

OR

- *Q2*) a) Discuss various RPC semantics in case of system failures. [6]
 - b) Outline the goals of distributed systems.
- Q3) a) Consider the following event diagram for processes P1, P2 and P3 executing in a distributed system. Compute the vector clock that is carried on each message.

b) Discuss with real scenario IBM's web sphere message- queuing system. [4]

P.T.O.

[4]

- Q4) a) Explain in details with an example Ricart and Agrawala algorithm for distributed mutual exclusion. [6]
 - b) State and explain any one primary based consistency protocol. [4]
- **Q5**) a) List and explain the design goals of the Sun NFS. [8]
 - b) Illustrate the concept of naming services and DNS in distributed systems.

[8]

OR

- *Q6*) a) Illustrate with an example how the BitTorrent is designed to provide support for downloading video files. [8]
 - b) Describe how the resources are managed to achieve QOS for an application in a distributed multimedia system. [8]
- Q7) a) Draw and explain in detail architecture of web service and principle behind introducing the concept of web service. [8]
 - b) Discuss the structure of request and response messages of HTTP for communication between a client and server. [8]

OR

- Q8) a) Draw and explain the general organization of an Apache web server.[8]
 - b) Give the disadvantage of using hierarchical caches for a web proxy. How can it be overcome through cooperative caching? [8]
- Q9) a) How are digital signatures used for message authentication? Point out the generation and verification process of a digital signature using public key cryptography.
 - b) Explain the secure mobile code in brief with reference to Java sandbox.[9] OR
- **Q10**)a) Discuss various security mechanisms in distributed systems? [9]
 - b) Describe the authentication process to log into a distributed system which uses Kerberos to setup a secure channel. [9]
